DETAILED ACTION

Claim Objections

Claims 15-17 are objected to as being an improper application of 35 U.S.C. 112. 1. 6th paragraph. The "means" should not be modified by sufficient structure, material or acts for achieving the specified function. See MPEP para 2181.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 1-3 and 6-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Molstad et al. (Molstad).

Regarding claims 1-3, Molstad teaches a tape in which servo signals are written in a width direction. See col 2, lines 52-61. Molstad further teaches that servo bursts can be written at different frequencies and provide an amplitude when read back by a head. See col 1, lines 47-55. Measuring the position of the head and calculating the difference between the position and a target position is taught at col 12, lines 62 to col 13, line 13. A servo read head is taught at col 3, line 18. A data read head and a write head are taught at col 6, lines 64-65.

Application/Control Number: 10/727,046 Page 3

Art Unit: 2651

Regarding claims 6 and 7, inventions 6 and 7 and 2 and 3 are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Claim Rejections - 35 USC § 103.

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. Claim 10-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Molstad in view of Bellesis et al. (Bellesis).

Regarding claims 10-12, Molstad teaches all the elements of the claim except for the supply reel and pickup reel and optical sensor. Bellesis teaches these features in para's [0030] and [0044]. At the time of the invention it would have been obvious to one of ordinary skill in the art to modify the teaching of Molstad with the use of an optical sensor since optical servo systems provide more reliability with magnetic read/write heads than with a magnetic servo system and may be aligned with the magnetic read/write head during its manufacture.

Application/Control Number: 10/727,046 Page 4

Art Unit: 2651

Allowable Subject Matter

6. Claims 4-5, 8-9, and 13-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mitchell R. Slavitt whose telephone number is (571) 272-7562. The examiner can normally be reached on M-F (6:30-4:00), 2nd Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David R. Hudspeth can be reached on (571) 272-7843. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
